

1.3.8 Module 8: Buddy

Enhances document interaction and text extraction, along with advanced speech and text-to-speech integration.

- e Enhanced Document Interaction and Text Extraction: Uses OCR technology to extract text from documents.

- e Advanced Speech Recognition Capabilities: Transcribes spoken words into text.

- ø Customized Text-to-Speech Integration: Converts text into spoken language with customizable options.

- e Reading Assistance: Combines OCR and TTS for automated reading assistance.

- ø Voice Commands: Enables navigation and text input through voice commands.

- e Interactive Document Interaction: Provides options for editing, sharing, and saving extracted text.
